all weather cushion: The fabric is backed, making it waterproof and highly resistant to moisture. In addition, the fabric has a Nanotex 'Resist' coating (PFAS-free). This coating ensures that stains such as red wine or oil can be easily wiped off the surface and do not soak into the fabric.

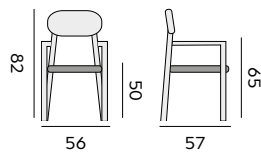

coussin toutes saisons : Le tissu est doublé, ce qui le rend imperméable et très résistant à l'humidité. En outre, le tissu est doté d'un revêtement Nanotex « Resist » (sans PFAS). Ce revêtement garantit que les taches telles que le vin rouge ou l'huile peuvent être facilement essuyées de la surface et ne pénètrent pas dans le tissu.

What is recycled teak wood?

Qu'est-ce que le teck recyclé ?

One of the most popular materials of the gescova collection is recycled teak. As we become more aware of sustainable materials and seek products which exude a genuine warmth and individuality, recycled teak ticks all of the boxes.

The goal is to provide the highest quality recycled teak hardwood without causing any damage to the environment. We properly utilize 100% reclaimed teak, salvaged from Indonesia, in a zero-waste facility. This means no trees are cut down as a result of our work. Instead, the wood is saved from structures that would have otherwise been demolished and discarded. This rare wood is then refined without any VOC or leeching glues, and delivered to you with hard work, integrity and a passion for the environment.

Le teck recyclé est l'un des matériaux les plus prisés de la collection Gescova. Alors que nous sommes de plus en plus sensibles aux matériaux durables et que nous recherchons des produits qui émanent une chaleur et une authenticité, le teck recyclé répond à toutes les attentes.

Notre objectif est de fournir du teck recyclé de la plus haute qualité sans porter préjudice à l'environnement. Nous utilisons à 100% du teck recyclé, récupéré en Indonésie, dans une usine zéro déchet. Cela signifie qu'aucun arbre n'est

abattu dans le cadre de notre travail. Au contraire, le bois est récupéré sur des structures qui auraient autrement été démolies et jetées. Ce bois rare est ensuite affiné sans produits chimiques (COV) ni colle à base de sang, puis livré après un gros travail, avec respect et passion pour l'environnement.

It starts with old growth wood that was harvested 200-300 years ago to build homes in Indonesia. As the years pass, the teak wood on the facade of the homes collects a patina that only intense sun and moisture can create. In the past decade, many of the neighborhoods throughout the Island nation of Indonesia have been razed to make way for newer and more modern buildings.

Instead of letting this gorgeous old growth teak go to waste, we purchase it before it can be destroyed. From these stacks of wood, we hand sort, hand sand and create some of the worlds finest, unique recycled teak products.

Il s'agit initialement de bois ancien, récolté il y a 200 à 300 ans pour la construction de maisons en Indonésie. Au fil des ans, le bois de teck des façades des maisons développe une patine que seul le soleil intense et l'humidité peuvent créer. Au cours de la dernière décennie, de nombreux quartiers des îles indonésiennes ont été rasés pour faire place à des bâtiments plus modernes.

Plutôt que de laisser ce magnifique teck ancien se perdre, nous l'achetons avant qu'il ne soit détruit. À partir de ces piles de bois, nous trions et ponçons à la main pour créer certains des produits en teck recyclé les plus fins et les plus uniques au monde.

We know teak is strong and aesthetically beautiful, but it's also naturally resilient to water, termites and rot and is relatively low maintenance. This makes it a perfect material for outside furniture. Its aesthetic qualities as a recycled product are unique too - as each piece has a different history, no two pieces will be the same.

Nous savons que le teck est robuste et esthétiquement beau, mais il est également naturellement résistant à l'eau, aux termites et à la pourriture, nécessitant relativement peu d'entretien. C'est donc un matériau idéal pour les meubles d'extérieur. Ses qualités esthétiques en tant que produit recyclé sont également uniques - chaque pièce ayant une histoire différente, il n'y a pas deux pièces identiques.

Maintenance tips recycled teak:

Conseils d'entretien du teck recyclé :

- Teak wood is naturally resistant to stains and water, so no need to worry too much about the spilled wine.

Le bois de teck est naturellement résistant aux taches et à l'eau, donc pas besoin de s'inquiéter des déversements de vin.

- If a spill does occur, wipe it up with a dampened cloth. This will ensure that the cells in the wood absorb some of the water, protecting against cracking.

En cas de déversement de vin, essayez-le avec un chiffon humide. Cela permettra aux cellules du bois d'absorber une partie de l'eau, évitant ainsi les fissures.

- To disinfect the furniture, use warm, soapy water. Using products with harsher chemicals will wear down the finish.

Pour désinfecter le meuble, utilisez de l'eau tiède et savonneuse. L'utilisation de produits contenant des substances chimiques agressives risque d'endommager la finition.

- Wood is a living product that moves with time and shrink and expand under influence of humidity and temperature changes. This can cause cracks and fissures in the wood. However, this process does not shorten the life of the teak. It is therefore nothing to worry about. This is precisely what makes the material so unique.

Le bois est un matériau vivant qui évolue avec le temps, se contractant et se dilatant sous l'influence de l'humidité et des changements de température. Cela peut entraîner des fissures et des craquelures dans le bois, mais cela n'affecte pas la durée de vie du teck. Il n'y a donc pas lieu de s'inquiéter, car c'est précisément ce qui rend ce matériau si unique.

Glass Reinforced Cement (GRC) is a durable and strong composite material reinforced with glass fibres, ideal for complex designs and outdoor use. It offers excellent resistance to cracking, extreme temperatures and weathering, and has been extensively tested for reliability. With easy maintenance and a long service life, GRC combines design, functionality and quality in one.

Le ciment renforcé de verre (GRC) est un matériau composite durable et solide renforcé de fibres de verre, idéal pour les conceptions complexes et l'utilisation en extérieur. Il offre une excellente résistance à la fissuration, aux températures extrêmes et aux intempéries, et sa fiabilité a été largement testée. Facile à entretenir et d'une grande longévité, le GRC allie design, fonctionnalité et qualité.

AGORA

100% dyed acrylic, Acrylique teint à 100%

Every Agora® solution dyed acrylic fabric collection offers an exceptional combination of strength and functionality. The fabrics are designed with the intention to be strong, durable and resistant. The water resistant finishing further improves the performance characteristics so that the fabrics are stain repellent, easy to clean and require a minimal but constant maintenance

Characteristics

- Teflon with stain and mildew resistant treatment
- 100% PU lamination
- Water repellent treated
- Good oil repelling properties
- Resistant to seawater
- UV resistant, with a light resistance index of 7 out of 8
- UV protection factor UPH 50+
- prevents heat and humidity condensation

Maintenance tips

Do not expose laminated side to UV rays or direct sunlight or any atmospheric agents. Washing in washing machine, delicate program, 30°C. Do not tumble dry. Clean stains with cloth or sponge moistened with a neutral soap solution, always on the fabric side. In case of stubborn stains a solution of < 5% bleach may be used instead. Do not dry clean nor use perchloroethylene. Iron on the fabric side only. Do not iron on the laminated side. Do not use pressure washers (Karcher type) on fabric. It may damage the lamination and/or peel it off.

Chaque collection de couleur acrylique teintée solution Agora® offre une combinaison exceptionnelle de force et de fonctionnalité. Les couleurs sont conçues avec l'intention d'être fortes, durable et résistant. La finition résistante à l'eau améliore encore les caractéristiques de performance de sorte que les couleurs sont anti-taches, faciles à nettoyer et nécessitent un entretien minimal mais constant.

Les caractéristiques

- Téflon avec traitement résistant aux taches et à la moisissure Stratification
- 100% PU Traitement déperlant
- Bonnes propriétés oléophobes
- Résistant à la saleté
- Résistant aux UV, avec un indice de résistance à la lumière de 7 sur 8
- Facteur de protection UV UPH 50+
- empêche la condensation de chaleur et d'humidité

Conseils d'entretien

N'exposez pas la face laminée aux rayons UV ou à la lumière directe du soleil ou à tout agent atmosphérique.. Lavage en machine à laver, programme délicat, 30 ° C Ne pas sécher en machine. Nettoyez les taches avec une éponge imbibée d'un savon neutre solution, toujours du côté de la couleur. En cas de taches tenaces, une solution d'eau de Javel <5% peut être utilisée à la place. Ne pas nettoyer à sec ni utiliser de perchloréthylène. Repasser du côté couleur uniquement. Ne pas repasser du côté laminé. N'utilisez pas de nettoyeurs haute pression (type Karcher) sur couleur. Cela pourrait endommager la plastification et / ou la décoller.

OLEFIN

100% Olefin, 190 grams m², 100% d'oléfine, 190 grammes m²

Characteristics

- Colorfast / sunlight resistant
- Lightfastness 7/8 (high)
- Light Water-repellent
- Hardwearing / strong
- Quick drying
- Breathable
- Low static / does not peel
- Resistant to influences of chemicals, dew, perspiration, rot and weather.
- Dirt resistant
- Very comfortable
- Light (Olefin fibers have the lowest specific gravity of all fibers)

Maintenance tips

Hand wash. Most stains can easily be removed by dabbing with lukewarm water When you have washed the fabric, let it dry on the line. Olefin does not need to be ironed.

Les caractéristiques

- Colorfast / résistant au soleil
- Résistance à la lumière 7/8 (haute)
- Hydrofuge léger
- Résistant / fort
- Séchage rapide

- Respirant
- Basse statique / ne pèle pas
- Résistant aux influences des produits chimiques, de la rosée,
- de la transpiration, de la pourriture et des intempéries.
- Résistant à la saleté
- Très confortable
- Légère (les fibres d'oléfine ont la densité la plus basse de toutes les fibres)

Conseils d'entretien

Lavage à la main. La plupart des taches peuvent facilement être enlevées en tamponnant avec de l'eau tiède. Lorsque vous avez lavé le tissu, laissez-le sécher sur la ligne. Oléfine n'a pas besoin d'être repassé

SUNBRELLA

100% dyed acrylic, Acrylique teint à 100%

Characteristics

- Rot and mold resistant
- Water repellent
- Resistant to seawater
- No damage or discoloration due to UV rays
- Easy to clean; brush a soap with water
- Breathable, does not become hot and does not stick
- Does not peel and does not become hard during use

Maintenance tips

Hand wash. Most stains can easily be removed by dabbing with lukewarm water. If the fabric has been washed, it must be dried on the line. Sunbrella does not need to be ironed.

Les caractéristiques

- Anti pourriture et moisissure
- Hydrofuge
- Résistant à l'eau de mer
- Aucun dommage ou décoloration dû aux rayons UV
- Facile à nettoyer; badigeonner un savon avec de l'eau
- Respirant, ne chauffe pas et ne colle pas
- Ne pèle pas et ne devient pas dur pendant l'utilisation

Conseils d'entretien

Lavage à la main. La plupart des taches peuvent facilement être enlevées en tamponnant avec de l'eau tiède. Si le tissu a été lavé, il doit être séché sur la ligne. Sunbrella n'a pas besoin d'être repassé.

SUNPROOF

100% Sunproof Olefin, 238 grams m², Oléfine 100% solaire, 238 grammes m²

Characteristics

- Colorfast
- Lightfastness high 8
- Water repellent
- Hardwearing / strong
- Quick drying
- Breathable
- Dirt resistant
- Comfortable

Maintenance tips

Hand wash. Most stains can easily be removed by dabbing with clear lukewarm water and a soft brush. For stubborn stains, we recommend using a mild soap. When the fabric is washed, let it dry in the open air. The Sunproof fabric does not need to be ironed

Les caractéristiques

- Grand teint
- Résistance à la lumière élevée 8
- Hydrofuge
- Résistant / fort
- Séchage rapide
- Respirant
- Résistant à la saleté
- Confortable

Conseils d'entretien

Lavage à la main. La plupart des taches peuvent facilement être enlevées en tamponnant avec de l'eau claire tiède et une brosse douce. Pour les taches tenaces, nous vous recommandons d'utiliser un savon doux Lorsque le tissu est lavé, laissez-le sécher à l'air libre. Le tissu Sunproof n'a pas besoin d'être repassé

MARIO SIRTORI SIESTA

100% Solution dyed polypropylene, 720 g/m²

100 % polypropylène teinté dans la masse, 720 g/m²

Characteristics

- OUTperform series in solution dyed Polypropylene
- 100% Recyclable fabrics
- Martindale and Pilling suitable for upholstery
- Anti-allergic
- Resistant to fungus, bacteria, sunlight, humidity, chlorine, food stains and sweat
- Compatible with delicate baby skin
- Eco-friendly (low energy for cleaning, long lasting life cycle, easy to use)
- Thermoregulating and transpiring
- Resists years of washing, no odor absorption, washing only at 30° cycle and with small detergent
- Quick drying, very comfortable and lightweight, easy to clean
- Bleach cleanable by using a very small quantity of bleach mixed up with water; it is very important that the bleach is properly removed with water and that the fabric is carefully dried up before sun light exposure.

Maintenance tips

Machine wash at 30 degrees Celsius and air dry (do not iron or tumble dry)

Les caractéristiques

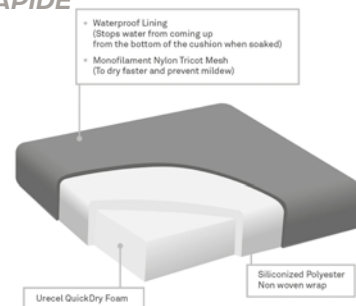

- Série OUTperform en polypropylène teinté dans la masse
- Tissus 100% recyclables
- Martindale et Pilling adaptés au rembourrage
- Anti allergène
- Résistant aux champignons, aux bactéries, au soleil, à l'humidité, au chlore, aux taches de nourriture et à la sueur
- Compatible avec la peau délicate de bébé
- Respectueux de l'environnement (faible consommation d'énergie pour le nettoyage, cycle de vie longue durée, facile à utiliser)
- Thermorégulatrice et transpirante
- Résiste à des années de lavage, pas d'absorption des odeurs, lavage uniquement au cycle 30° et avec une petite lessive
- Séchage rapide, très confortable et léger, facile à nettoyer
- Nettoyable à l'eau de Javel en utilisant une très petite quantité d'eau de Javel mélangée à de l'eau ; il est très important que l'eau de Javel soit correctement éliminée avec de l'eau et que le tissu soit soigneusement séché avant l'exposition à la lumière du soleil.

Conseils d'entretien

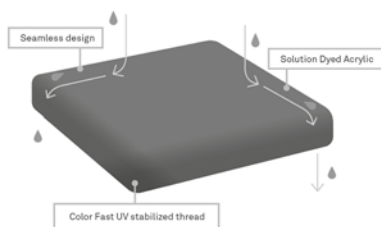

Lavage en machine à 30 degrés Celsius et séchage à l'air libre (ne pas repasser ni sécher au sèche-linge)

QUICK DRY FOAM, MOUSSE À SÉCHAGE RAPIDE

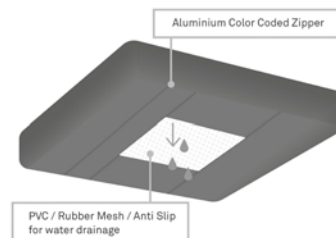

- anti microbial
- volatile organic compound
- environmentally friendly
- high durability
- antimicrobien
- composé organique volatil écologique
- Haute durabilité

Cushion cover (Top View)

Cushion cover (Bottom View)

Maintenance instructions teak

- As teak is rich in natural oils, the weathering process includes oil surfacing which can cause stains on cushions. Please be aware that oil surfacing is a naturally repeating process that cannot be prevented.
- After having applied Teak Protector or Teak Sealer, protect your furniture from rain for 24 hours to avoid water stains. Do not put covers on recently treated furniture.
- Avoid dark marks from vases, pottery and plastic coasters by moving them regularly. Also avoid the use of plastic tablecloths.
- Always try to remove spillings from food or beverages, fallen leaves, berries, blossoms and bird droppings as quickly as possible to avoid stains and mould.
- Do not use varnish on your wood as it may cause wood rot, blisters or peel off, nor linseed/teak oil as it can cause irreversible damage to the teak

instructions d'entretien du teck

- Le teck étant riche en huiles naturelles, le processus de vieillissement entraîne la remontée d'huile à la surface, ce qui peut causer des taches sur les coussins. Veuillez noter que la remontée d'huile est un processus naturel qui se répète et qui ne peut être évité.
- Après avoir appliqué le protecteur ou le scellant pour teck, protégez vos meubles de la pluie pendant 24 heures afin d'éviter les taches d'eau. Ne couvrez pas les meubles récemment traités.
- Évitez les marques sombres laissées par les vases, la poterie et les sous-verres en plastique en les déplaçant régulièrement. Évitez également d'utiliser des nappes en plastique.
- Essayez toujours d'éliminer le plus rapidement possible les éclaboussures de nourriture ou de boissons, les feuilles mortes, les baies, les fleurs et les fientes d'oiseaux afin d'éviter les taches et la moisissure.
- N'utilisez pas de vernis sur votre bois, car cela pourrait provoquer la pourriture du bois, la formation de cloques ou le décollement, ni d'huile de lin/teck, car cela pourrait causer des dommages irréversibles au teck.
